

INSTRUCTIONS FOR USE OF THE BIKE CLEANER AND DEGREASER WAX LUBRICANT:

- 1.- Spray directly on the surface of the bike, including components, and leave for 2–3 minutes.
- 2.- In areas with hardened dirt rub with a sponge or brush depending on the area.
- 3.- Rinse thoroughly with water bike.

We recommend, if necessary, use the machines properly pressurized water for washing the bike (not applying directly on bearings and delicate parts), just as we recommend not to apply the product directly on sensitive areas of the bicycle, as overalls suspension and telescopic seatpost.
